$$\boxed{1} + \boxed{0} = \boxed{1}$$

Quantencomputer

The diagram shows three circular dials, each divided into eight segments. The top-left dial has segments labeled 1, 0, 1, 0 (top) and 0, 1, 0, 1 (bottom). The top-right dial has segments labeled 1, 0, 1, 0 (top) and 0, 1, 0, 1 (bottom). The bottom dial has segments labeled 1, 0, 1, 0 (top) and 0, 1, 0, 1 (bottom). Each dial has a vertical arrow pointing down to its center and a small circle at the center. The dials are arranged in a row, separated by a plus sign and an equals sign, representing the equation: $\text{Dial 1} + \text{Dial 2} = \text{Dial 3}$.
